Features: Make one or many backup images from your existing files and folders Save unlimited number of copies of a single backup image and manage them using free-to-try Support multi-OS, multi-user and multi-device Each backup image can be restored to any of the files/folders with any of the restore locations Support all the commonly used file system and file system restoration types Do not require special knowledge or complicated options Reliable Rely on complete and regular backups to not lose your existing data Advanced restore features for enterprise environments Keep your data safe even during network crashes Carry your data to other locations Resume interrupted file restores Support for ISO and Microsoft Windows MSIs Unlimited data disk space Support all major Linux file systems including ext3/ext4, xfs, reiserfs, btrfs Support for Windows NTFS Support for FAT32 Support for CIFS Support for FTP Integrated with the Explorer and Synching Support for many famous backup image formats including S3/S3a, Google Cloud Storage, Amazon S3, OneDrive, Mega, FTP, NAS backup format, ZIP, RAR, 7z, BZIP2, CBR and CBZ Support all popular Windows backup tools including Windows' built-in Backup tool, Virtual CloneDrive (VCD), Windows Live Sync and Microsoft's Backup and Restore (MBR/MBP) Compatible with old versions of Windows Efficient and fast Low resource requirement No need to download big files in both the restoration and backup High performance for hard disks with up to 2TB capacity Easy to use and intuitive Support multi-thread Originally I was going to just package some of the fixes I have made into a utility. However, I was thinking about not creating a free tool for this as I would rather have something that supports my company's servers and employees (and that they can use on their own systems). I've already thought about and made some offerings that fall under this category. A way to make a product that uses the free features from this utility, but with a commercial license. I am only considering making a commercial release because most people I know tend to be short on money, and would prefer to have the tools I make commercial rather than free. I would have to put a lot of effort into this product though, so there would be a higher price. 82157476af
